New Silver - June Investor Update

Delivered targeted 1.00% monthly distribution.

“Short-duration, asset-backed lending remains a compelling space, and we continue to execute with the same underwriting discipline and portfolio management that has defined this platform from day one. The Fund earned a #6 ranking in BarclayHedge's Fixed Income – Asset-Backed Loans category for April 2026, in what continues to be a competitive peer group. We remain focused on what drives that performance - quality collateral, experienced borrowers, and conservative loan-to-value metrics across the portfolio. Thank you for your continued trust and partnership.” - Eric Wilson, New Silver Capital.
